

THE PRODUCTION PERFORMANCE & POTENTIAL OF POLYMERS IN CONCRETE

Editor: Dr Barry W. Staynes

BRIGHTON
POLYTECHNIC

5th International Congress on Polymers in Concrete, Brighton, England

22–24 September 1987

	<u>Page</u>
<u>PREFACE</u>	v
1. <u>INTERNATIONAL PERSPECTIVES</u>	
SESSION 1	
1.1 <u>D. Fowler</u> Current status of polymers in concrete	3
1.2 <u>W.O. Nutt</u> State of the art in Europe	9
1.3 <u>K. Okada & Y. Ohama</u> Recent research and applications of concrete-polymer composites in Japan	13
SESSION 8	
1.4 <u>E. Chorinsky</u> Polymers in cement mortars in Germany 1950-1987	23
1.5 <u>J. Raymond & B. Sauntson</u> Resins and polymers for grouts, concrete and filled systems - a wide perspective	27
1.6 <u>W. Yuanli</u> Emergence and status of polyester concrete industry in China	33
1.7 <u>D. Kruger</u> Furfuryl alcohol polymer concretes - research and developments in Southern Africa, phase 2	37

<u>2. CONSTRUCTION I - DESIGN, PRODUCTION & PERFORMANCE</u>		<u>Page</u>
SESSION 2		
2.1	<u>T. Yamasaki & K. Miyakawa</u> A study on the rheological mix design of unsaturated polyester resin concrete	43
2.2	<u>U. Gans</u> Production process of silex polymer concrete products and their application	49
2.3	<u>P. Mendis</u> Polymer concrete overlays and applications	53
2.4	<u>I. Eldarwish & W. Wahby</u> Polymers in building bricks	59
2.5	<u>V. Rukin, V. Davydov, N. Dmitriev, S. Laschenov, H. Nasredinov, I. Kim</u> Polymercement concrete and shotcrete in hydraulic engineering	65
2.6	<u>Y. Ohama, K. Demura & A. Shimizu</u> Process technology and properties of ready-mixed polyester concrete	71
SESSION 9		
2.7	<u>L. Goland, D. Fowler, C. Yew & D. Wheat</u> Characteristics of polymer concrete subjected to projectile impacts	75

3. <u>CONSTRUCTION II - DESIGN & BEHAVIOUR</u>	<u>Page</u>
SESSION 13	
3.1 <u>K. Okada, T. Miyagawa & W. Koyanagi</u> Design recommendation for polyester resin concrete structures	81
3.2 <u>K.S. Yeon, D. Fowler & D. Wheat</u> Static flexural behaviour of various polymer concrete beams	85
3.3 <u>C. Venâncio & J. Bordado</u> Tailoring concrete properties - concrete flexibilisation with polymers	91
3.4 <u>J. Hristova & R. Bares</u> Relation between creep and performance of PC	99
3.5 <u>R.S. Ayyar, S. Joshi & S. Deshpande</u> Creep of polymer concrete at elevated temperature	103
3.6 <u>V. Reznik</u> Polymer consumption and reliability of ferro concrete structures	109
SESSION 9	
3.7 <u>Y. Ohama, M. Sugi & M. Hamatsu</u> Improvement in freeze-thaw durability of polymer concretes with wet aggregates	113
3.8 <u>R. Letsch</u> Polymer mortar overlays - measurement of stresses	119

4. PRODUCTION ENGINEERING I - MACHINE TOOL MANUFACTURE

Page

6. F

SESSION 3

- | | | |
|-----|---|-----|
| 4.1 | <u>T. Phillips</u>
A specific polymer concrete for machine structures | 127 |
| 4.2 | <u>R. Kreis</u>
Preparation methods for polymer concrete and mortar | 133 |
| 4.3 | <u>P. Koblischek</u>
Motema - AC. The non-metallic casting material -
6 years after its introduction | 139 |
| 4.4 | <u>E. Brandau</u>
Polymer concrete and polymer mortar processing and its
application to mechanical, electrical and electronic
products | 145 |

5. PRODUCTION ENGINEERING II - MACHINE TOOL PERFORMANCE

SESSION 6

- | | | |
|-----|--|-----|
| 5.1 | <u>H. Schulz</u>
Static and dynamic characteristics of machine tools made
of polymer concrete | 151 |
| 5.2 | <u>H. Dey</u>
Tests with models of polymer concrete | 155 |
| 5.3 | <u>V. Patureov, A. Volgushev & V. Elfimov</u>
Peculiarities of polymer concrete application in the
machine tool industry | 159 |

6. <u>FUNDAMENTAL PROPERTIES I</u>	<u>Page</u>
SESSION 10	
6.1 <u>C. Vipulanandan, N. Dharmarajan, E. Ching</u>	165
Stress-strain behaviour of polymer concrete systems	
6.2 <u>K. Grosskurth & A. Konietzko</u>	171
Structure and mechanical behaviour of polymer modified cement concrete	
6.3 <u>A. Aguado, J. Salla, A. Martinez & P. Saura</u>	175
Influence of porosity on the variability of mechanical properties of polymer polyester concrete	
6.4 <u>Y. Ohama, K. Nawata & T. Kobayashi</u>	179
Reduction in setting shrinkage of polymethyl methacrylate concrete	
7. <u>FUNDAMENTAL PROPERTIES II</u>	
SESSION 9	
7.1 <u>C. Armeniades, J. Stormer & E. Haque</u>	187
Cure shrinkage control with strength enhancement in polymer concrete by combining polymerization with mineral dehydration: montmorillonite polymer concrete	
7.2 <u>C. Armeniades & N. Dharmarajan</u>	193
A constitutive equation for creep in polymer concrete	
7.3 <u>K. Gorur & F. Wittman</u>	199
Hydration of a cement in a polymer system	
7.4 <u>T. Gregory</u>	205
The measurement of early strength development in polymer-modified cement pastes	

	<u>Page</u>
7.5	209
	<u>M. Kawakami, H. Tokuda, K. Ishizaki,</u> <u>M. Kagaya & I. Takahasi</u> Thermal stress and shrinkage stress of concrete polymer composite cylinders
7.6	215
	<u>T. Muhua, Z. Wen, W. Keru & H. Yiun-yuan</u> The preparation of polymer cement mortar with acidic cationic polychlorobutadiene emulsion and the mechanism of its property modification
7.7	219
	<u>J. Salla, A. Aguado, P. Saura & A. Martinez</u> The effect of addition procedure of silane coupling agents on the behaviour of polymer concrete
7.8	223
	<u>E. Semerad, P. Kremnitzer, W. Lacom,</u> <u>F. Holub & P. Sattler</u> Polymer modified mortar: influence of polymer addition on macroscopic and microscopic properties
7.9	229
	<u>G. Dullinger</u> Activated organofunctional silanes as coupling agents in polymer concrete

8. PRECAST AND DECORATIVE APPLICATIONS

SESSION 12

8.1	241
	<u>F. Spence</u> Polymers in concrete - architectural and decorative applications. A specialist use of pigmented polyester resins, sands and aggregates in simulated stone, brick and granite finishes
8.2	243
	<u>Y. Kimura, K. Murakami & S. Tanaka</u> Remodelling of precast resin concrete manholes
8.3	251
	<u>J. Dikeou</u> Precast polymer concrete in the United States

8.4	<u>X. Yaping, C. Heyun & F. Ruiliang</u> The study of PC-GRC composite for decoration	257
8.5	<u>A. Maxstadt</u> Modern curing systems for polyester concrete and cultured marble	265
8.6	<u>R. Johnston</u> A colourful face to concrete	267
SESSION 9		
8.7	<u>M. Gunasekaran</u> Polymer concrete insulators: past, present and future	271

9. **REPAIR AND RENOVATION I – RESTORATION**

SESSION 5

9.1	<u>C. Bowden & J. Shaw</u> The use of polymers to repair ancient buildings	277
9.2	<u>M. Maultzsch</u> Properties of PCC for repair of concrete structures	281
9.3	<u>R. Webster & L. Kukacka</u> In situ repair of deteriorated concrete in hydraulic structures	287
9.4	<u>T. Bülge</u> Evaluation of polymers for improving cement mortars	293
9.5	<u>B. Staynes & T. Willway</u> The composite behaviour and delamination of thin surface overlays and repairs - identification and measurement of controlling parameters	301

- 9.6 E. Hackel, P. Beng & S. Hörler 305
The use of redispersible polymer powders in concrete restoration

SESSION 9

- 9.7 M. Naderi, D. Cleland & A. Long 309
Polymer modified repair materials - strength and durability

10. REPAIR AND RENOVATION II - STRUCTURAL PERFORMANCE

SESSION 11

- 10.1 M.F. Cánovas 317
Strengthening of concrete structural elements by means of glued steel plates with epoxy adhesives
- 10.2 P. Cady & R. Weyers 323
Deep polymer impregnation of a bridge deck using the grooving technique
- 10.3 R. Kwasny 329
Qualification tests on PCC systems for the repair of concrete road bridges - adhesion of PCC on concrete
- 10.4 N. Emberson & G. Mays 335
Polymer mortars for the repair of structural concrete: the significance of property mismatch
- 10.5 F. Hassan, A. Allos, N. Amso, A. Murjan & H. Hassoon 343
Evaluation of strengthening mechanism and repair of damaged beams under pure flexure
- 10.6 M. Fiebrich 351
Technical adhesion strength between polymer coatings and concrete substrate

- 10.7 G. Tognon & S. Cangiano 357
 Mechanical properties of the mortar-aggregate interface in polymer-impregnated concretes (PIC)

11. UNDERWATER CONSTRUCTION - NON-DISPERSIBLE CONCRETE

SESSION 7

- 11.1 B. Staynes & B. Corbett 363
 The role of polymers in underwater and slurry trench construction
- 11.2 S. Sogo, T. Haga & T. Nakagawa 369
 Underwater concrete containing segregation controlling polymers
- 11.3 B. Davies 375
 Laboratory methods of testing concrete containing polymers for placement underwater
- 11.4 N. Nakajo 379
 Non-dispersible underwater concrete mixed with cellulose ether based polymer
- 11.5 T. Kawai 385
 Non-dispersible underwater concrete using polymers

12. WASTE MANAGEMENT - CORROSION RESISTANCE

SESSION 4

- 12.1 M. Gunasekaran 393
 Potential of polymer concrete composites for hazardous waste management applications
- 12.2 T. Yamamoto 395
 Corrosion control by pre-cast polymer concrete and carbon fiber reinforced coal ash sand for resin lining

- 12.3 J. Fontana, W. Reams & H. Cheng 399
 Potential polymer concrete heat exchanger tubes for
 corrosive environments

SESSION 9

- 12.4 M. Kawakami, H. Tokuda, M. Kagaya, 405
T. Shimizu & F. Fujiwara
 Durability of concrete polymer composite to strong
 acid water

13. STRATEGIC PERSPECTIVES

SESSION 14

- 13.1 W.O. Nutt & B. Staynes 413
 The next 25 years
- 13.2 R. Bares & L. Czarnecki 417
 Concrete polymer composites in RILEM activity - current
 status and prospects

14. AUTHOR INDEX 423
