Dipartimento di Chimica Applicata e Scienza dei Materiali

IXth

INTERNATIONAL CONGRESS ON
POLYMERS IN CONCRETE

ICPIC '98

Bologna, Italy - September **14-18**, 1998

CONFERENCE PROCEEDINGS

Editor Franco Sandrolini

AIMAT
Associazione Italiana
di Ingegneria dei materiali

gi RILEM
Gruppo Italiano
Rilem

Edizioni Casma s.r.l., Bologna

CONTENTS

Main lectures:

Ohama Y. - New research and development of concrete-polymer composites in Japan	p.	1
Czarnecki L., Sandrolini F. - Paradigms in polymers in concrete		21

NEW MATERIALS AND TECHNOLOGIES **35**

Main Lecture:

Fowler D. W. - Current status of polymers concrete in the United States		37
--	--	----

Papers:

Laus M., Giardini C., Fiorini M., Francescangeli O., Sandrolini F. - Hybrid nanocomposites based on organophilic clays and poly (styrene- <i>b</i> -butadiene) copolymers		45
Orlovskij Y., Livsha R., Margal I. - Stability of polymer sulphur concrete with steel reinforcement		57
Vroom C.H., Vroom A.H. - The future of antique structures: sulfur concrete for restoration and reconstruction		63
Nofal N. M. - Plastic shrinkage of concrete as affected by water reducing admixtures and cement replacement materials		75
Muravljev M., Pakvor A., Jankovic K. - Polymer influence on some physical mechanical properties of concrete based on recycled bricks		83
Tatsuyuki K., Omata F., Kawakami M. - Prevention of macro cell formation in the steel inside the concrete by polymer cement paste containing anticorrosives		89
Byun K.-J., Song H.-W., Park S. S., Song Y.-C. - Development of structural lightweight foamed concrete using polymer foaming agent		99
Popov K., Kaddo M. - Self-leveling wear topping on the base of Polymer-Cement-Concrete		107
Kreis R. - Continuous production of polymer concrete - A new generation of machines		111
Chistjakov V. V., Cripka L. N. - Pressed cement-polymer materials		121
Kruger D., Pretorius J. - Development of light weight polymer modified mortar partitioning panels		127
Brailovski M. - Components and elements of machines and equipment from polymer concretes		133
Vidaurre H. V., Dufeu J. L., Bendek W. - Void and gas occlusion free dielectric polymeric composite materials and cost effective manufacturing processes for production of high reliability electric insulators		139
Bignozzi M. C., Sandrolini F., Saccani A., Bonora V., Zucchetti M. - Recycling plastics in polymer mortars		151

PHASES AND MICROSTRUCTURE 163

Main Lecture:

Puterman M., Malorny W. - Some doubts and ideas on the microstructure formation of PCC 165

Papers:

Bubani M., Tassone P. - Effect of pore size distribution on mechanical strength of polyester concrete 179

Beeldens A., Van Gemert D. - Strength and durability of porous Polymer Cement Concrete 189

Ahn N., Fowler D. W. - The effects of metallic monomers on the bond strength of polymer concrete to wet substrates 199

Czarnecki L., Chmielewska B. - The influence of microfillers and coupling agents on the selected properties of vinyl ester mortars 217

Justnes H., Reyners T., Van Zundert W. - The influence of latices and redispersible powders on hydration and strength development of polymer cement mortars 225

Lutman M., Sever-Skapin A., Trebse N. - Structure of plastomer in polymer-modified Concrete 239

Chandra S. - Interaction of polymer with tricalcium aluminate and cement fondu 245

Yamamoto T., Osaki K., Wakasugi M., Sugiura A., Sakakibara H. - Adhesive strength of modified cement mortar with redispersible polymer powders 255

Cem Ercan, Ozkul H. M. - Effect of filler content and type on rheological and mechanical properties of Epoxy concretes 263

MECHANICAL PROPERTIES AND FIBER REINFORCEMENT 275

Main Lecture:

Dikeou J.T. - Structural design of polymer concrete products 277

Papers:

König G., Deutschmann K., Kutzing L., Sicker A. - Improving the ductility of high performance concrete under compression 287

Kobayashi Y., Ayukawa M., Hino H. - Increasing resin mortar strength and dynamic characteristics of non-shrinking resin mortar integrated with steel materials 295

Yeon K. S., Kim K. H., Jin N. J., Shin Y. S. - Shear performance of reinforced polymer concrete beams with high strength 303

Zeggio S., Toncelli M., Sandrolini F. - Agglomerated stone products with outstanding physical-mechanical properties 313

Shirai A., Ohama Y. - Properties of polymer-modified mortars with garnet sand 321

Oshima M., Hayashi F., Koyanagi W., Uchida Y. - On the size effect on flexural strength of resin concrete 329

Shambira V., Nounu G. - A numerical study of patch repairs in axially loaded reinforced concrete short columns 337

San José J. T., Ramirez J. L., Rz-Maribona I. - Polymer reinforced concrete: calculation procedure in bending 351

Lyashenko T., Voznesensky V. - Modelling the influence of composition on probabilistic indices of building polymer composites quality	361
Prusinski R. C. - A forty year historic perspective related to the aging of construction-oriented polymer concretes	369
Ohama Y., Demura K., Watanabe M. - Feasibility study of polymer-modified pastes using rice husks for building materials	375
Keiter B.H., Fowler D.W., Laurence L. - Use of epoxy-based fiberglass reinforced plastic repair system for bridge repair	383
Tu L., Kruger D. - Effect of increased fibre surface wettability on the flexural performance of polypropylene fibre reinforced concrete	391
Bokan-Bosiljkov V. - Load bearing behaviour of steel fibre reinforced concrete with composite polymer-cement binder	401
Sustersic J., Ukrainczyk V., Zajc A., Sajna A. - Evaluation of post crack behaviour of polymer cement steel fibre reinforced concrete (PC-SFRC)	409
Herroelen B., Van Gemert D., Brosens K. - Repair and strengthening of a swimming pool roof structure using polymer concrete and CFRP-laminates	419
REHABILITATION OF OPC STRUCTURES AND CONSERVATION OF ARCHITECTURAL HERITAGE	427
<i>Main Lecture:</i>	
DePuy G. W. – Uses of polymers in concrete	429
Technical development of Concrete Polymer materials	441
<i>Papers:</i>	
Murray M.A. - Polymers, the versatile materials for the repair, rehabilitation and protection of the infrastructure	447
Pretorius J., Kruger D. - The suitability of polymer modified cementitious mortar for concrete repair in South Africa	455
Frigione M., Aiello M. A., Acierno D. - Rehabilitation of reinforced concrete structures with polymeric composites: the role of the adhesive	463
Seidler P. - Repair mortars from reaction polymers	471
Kruger D. - Large diameter pipeline repair using polymer-modified concrete	479
Omata F., Kawakami M., Doiuchi K., Hano H. - A study on setting shrinkage of polymer mortar using GM/ST	487
Morohashi T., Horikowa K., Naniwa R., Iibachi H., Hayashi Y. - Automatic injection system for concrete structures using self-expansive epoxy resin	497
Gumina T. V. - Low pressure polymer injection: two case studies	505
Maultzsch M., Hoffmann D. - Effects of short curing on the performance of PCC	509
Wakasugi M., Yamamoto T., Osaki K. - Experimental study on use of polymer modified ultra fine cement slurry as an injecting material for steel jacketing	515
Leskovar I., Magajne D. - Restoration of monument concrete church tower in Ribnica	525
Koblischek P.J. - PMMA latex as binder for restoration mortars	531
Dragicevic Lj., Djordjevic S., Canak-Medic M. - Laminated slag and polymer composites in mortars for plastering cultural monuments	539
Dragicevic Lj., Rsumovic M., Barisic S. - Application of polymers in the restoration of damaged stone surfaces	547

Herroelen B., Van Geemert D., Dereymaeker J., Heinrich F. - Repair of ancient masonry sewage canals using polymers and polymer cement concrete (PCC)	557
Dragicevic Lj., Sbrinovic M., Tanaskovic V. - Application of polymers in the making of new works of arts	569
Van Gemert D., Herroelen B., Schueremans L., Dereymaeker J. - Strengthening of wooden structural elements by means of polymer concrete	577
Maximov Y.V., Soloviov G.K., Trambovetsky V. P. - Polymer concretes on methyl methacrylate base hardened under sub-zero temperatures	589
Stankovic S., Rsumovic M. - Repair of an oil refinery cooling tower with polymer Application	593
Orlovskaja E., Kamennov I. - Color decorative polymeric sulphur mastics and concretes for restoration and repair	603

DURABILITY, AGING AND TESTING **609**

Papers:

Dimmig A., Stark J. - An investigation of durability of polymer cement concrete/mortar (PCC)	611
Justnes H., Reyners T., Van Zundert W. - Moisture transport in polymer cement mortars based on latices and re-dispersible polymer powders	633
Schwamborn B., Westendarp A. - Polymer-modified cement slurries in hydraulic engineering construction	647
Sasse H. R., Riecken B., Overmeer K., Van Gemert D. - Influence of gypsum on the durability of a stone protective treatment	657
Suraatmadja D., Munaf D. R., Lationo B. - Chemical resistance of polymer mortars containing waste material	667
Kampfer W., Berndt M. - Polymer modified mortar with high resistance to acid and corrosion by biogeneous sulfuric acid	681
Vallée F., Gandini A., Copé R. - Investigation on the behaviour of PC composites: application to external insulation (ETI) renders	689
Lissenko V. A. - Durability and structure formation of polymer composites for restoration and conservation of ancient architectural heritage	699
Krivenko P.V., Semenuk A. P., Olbinskya T. A. - The durability of high slump slag alkaline concretes with latex	709
Moriyoshi A., Ishikawa H., Takahashi S., Cabrera J. C., Van Gemert D. - Effects of additives on bitumens	715
Tarasov V. I. - New polymer silicon compound for stone protection	725
Chandra S. - A freeze and thaw resistance of high strength mortars with polymers	733
Nemec T., Polsak G., Apih V. - Testing of efficiency of hydrophobic treatment of concrete by freeze-thaw test and neutron radiography	739
Kyriacou K.C., Wheat D., Fowler D.W. - A new flexural creep test method and its application to polymer concrete	747
Garbacz A., Czarnecki L., Clifton J. R. - Ultrasonic methods to assess polymer concrete properties	761
Courard L. - Parametric definition of sandblasted and polished concrete surfaces	771
