

**13<sup>th</sup> International Congress on Polymers in Concrete**  
**10-12 February 2010**  
**Funchal – Madeira, Portugal**

**Editors**

**José Barroso de Aguiar**

**Saíd Jalali**

**Aires Camões**

**Rui Miguel Ferreira**

## Contents

<b>Preface</b>	<b>xv</b>
<b>International Scientific Committee</b>	<b>xvi</b>
<b>Sponsors</b>	<b>xvii</b>
<b>Cooperating Intitutions</b>	<b>xviii</b>
<b>Keynote Papers</b>	<b>xxi</b>
Concrete-polymer composites – The past, present and future <i>Ohama, Y.</i>	1
Concrete-polymer composites (C-PC) – Change per continuation (CpC) <i>Czarnecki, L.</i>	15
Contribution of C-PC to sustainable construction procedures <i>Van Gemert, D.; Knapen, E.</i>	27
Seven well known fundamental flaws against innovations in construction chemistry <i>Seidler, P.</i>	37
Polymer concrete overlays – History, performance and practice <i>Fowler, D. W.</i>	43
Service life of concrete structures rehabilitated with polymers <i>Aguiar, J. B.; Camões, A. F.</i>	51
<b>Micro and Nanostructure of Concrete-polymer Composites</b>	<b>63</b>
Effect of structure of polymer on properties of Polymer Cement Composite <i>Nair, P. S.; Thachil, E. T.</i>	65
Interaction of sodium salt of polyacrylate polymers during Portland cement hydration <i>Gajbhiye, N. S.; Singh, N. B.; Middendorf, B.</i>	73
Microstructural analysis of paste and interfacial transition zone in cement mortars modified with water-soluble polymers <i>Knapen, E.; Van Gemert, D.</i>	81
Shrinkage properties of Polymer-modified Cement Mortars (PCM) <i>Bode, K. A.; Dimmig-Osburg, A.</i>	89

Concrete with latex and biopolymer, part II: Scanning electronic microscopy and X-ray diffraction <i>Bezerra, U. T.; Ferreira, R.M.; Castro Gomes, J. P.</i>	95
Hydration evaluation of Portland cement modified with polyvinyl alcohol and nano clay <i>Pique, T. M.; Balzamo, H. M.; Vazquez, A.</i>	101
Hydration of cement in the presence of SBR dispersion and powder <i>Wang, R.; Wang, P.</i>	109
<b>Properties of Concrete-polymer Composites</b>	<b>117</b>
Effects of flame retardants on fire-protecting performance of Polymer-Modified Mortars <i>Shirai, A.; Ohama, Y.; Kokubun, Y.</i>	119
The effect of the fire flame retardant type on the durability of polymer concrete exposed to elevated temperature <i>Elalaoui, O.; Ghorbel, E.; Benouzedou, M.</i>	127
Waterborne epoxies in cementitious matrices used for textile reinforced concrete <i>Keil, A.; Raupach, M.; Puterman, M.</i>	135
Optimal composition, strength and chemical resistance of silicate polymer concrete <i>Figovsky, O.; Beilin, D.</i>	143
The deformation behaviour and stiffness evolution of polymer modified cement concrete (PCC) <i>Flohr, A.; Bode, K. A.; Dimmig-Osburg, A.</i>	153
Study of viscoelasticity of polymer concrete by dynamical mechanical analysis <i>Zhang, Z.; Yang, Z.; Shi, M.</i>	161
Influence of polymer addition on the properties of reactive powder concrete <i>Zhong, S.; Wang, Y.</i>	165
Effect of epoxy resin addition on the moisture sensitivity of macro defect free Polymer-Cement Composites <i>Ekincioglu, O.; Ozkul, M. H.; Ohama, Y.; Patachia, S.; Moise, G.</i>	171
Concrete with latex and biopolymer, part I: Monitoring of compressive and tensile strength <i>Bezerra, U. T.; Ferreira, R. M.; Castro Gomes, J. P.</i>	179
Flexural Characteristics of FRP-Reinforced Polymer Concrete Panel <i>Yeon, K. S.; Choi, Y. S.; Hyun, S. H.; Hwang E.</i>	187
Lightweight mortar obtained from recycled polyurethane foam <i>Calderón, V.; Gadea, J.; Rodríguez, A.; Garabito, J.</i>	195

Obtention of lightweight concrete by addition of rigid polymer foam wastes <i>Rodríguez, A.; Gadea, J.; Garabito, J.; Calderón, V.; Aragón, A.</i>	201
Study on shrinkage and cracking performance of SAP-modified concrete <i>Chen, D.; Liu, C.; Qian, C.</i>	205
Properties of poly(vinyl alcohol) fiber reinforced high-performance organic aggregate cementitious material <i>Toutanji, H. A.; Xu, B.; Lavin, T.; Gilbert, J. A.</i>	213
Effect of types and contents of polymer resin on spalling prevention of high strength concrete subjected to fire <i>Han, C. G.; Han, M. C.; Pei, C.; Yang, S. W.</i>	221
Effect of water soluble polymers on the early age shrinkage of cementitious composites using ring test method <i>Lin, S. T.; Huang, R.; Chang, C. Y.</i>	231
Influence of ambient temperature conditions on the effect of stabilising polymers in cementitious building materials <i>Schmidt, W.; Kühne, H. C.; Meng, B.; Brouwers, H. J. H.</i>	241
Durability of polyester polymer concrete under the influence of chemical solutions <i>Robles, M.; Galán, S.</i>	249
Effects of micro and nano-sized Al <sub>2</sub> O <sub>3</sub> particles on mechanical behaviour and fire reaction properties of epoxy polymer mortars <i>Ribeiro, M. C. S.; Pereira, C. M. C.; Martins, M. S. S.; Marques, A. T.; Ferreira, J. M.</i>	257
Chemical shrinkage of pastes made with shrinkage reducing admixtures <i>Bettencourt-Ribeiro, A.; Gonçalves, A.; Medina, V.; Gomes, A.</i>	265
Functional and structural properties of hybrid polyurethane-cement foam <i>Verdolotti, L.; Lavorgna, M.; Iannace, S.</i>	273
Effect of calcium fly ash on PC properties <i>Garbacz, A.; Sokołowska, J. J.</i>	281
PC and LMC with granulated rubber made from waste car tires <i>Šušteršič, J.; Zajc, A.; Leskovar, I.; Dobnikar, V.</i>	289
Use of prepackaged polymer-modified mortar as modifier to concrete: A new approach to produce Polymer-Modified Concrete <i>Saand, A.; Ismail, M.; Sumadi, S. R.</i>	299
Influence of polymer addition on vegetable fibers/cement composites properties <i>Onésippe, C.; Bilba, K.; Arsène, M. A.; Delvasto, S.; Toro, E. F.</i>	305
The effect of polymer emulsions on the rheological properties of PCC mixtures <i>Kubens, S.; Wallevik, O. H.; Puterman, M.</i>	313
Mechanical behaviour and thermal conductivity of mortars with waste plastic particles <i>Corinaldesi, V.; Mazzoli, A.; Moriconi, G.</i>	321

Applications in reducing environments of SiC content special concretes <i>Angelescu, N. G.; Muthu, K. U.</i>	327
Evaluation of air permeability of hardener-free epoxy-modified mortars by nondestructive testing method <i>Bhutta, M. A. R.; Imamoto, K.; Ohama, Y.</i>	333
An experimental study on the properties of water-hardening epoxy mortar using rapidly cooled steel slag <i>Park, S.; Kim, J.; Kwak, E.; Hwang, E.</i>	341
High performance cement/polymer composite materials with self-compacting properties <i>Sandrolini, F.; Manzi, S.</i>	349
Surfology: What does it mean for polymer concrete composites? <i>Courard, L.; Garbacz, A.</i>	355
<b>Test Methods and Applications of Concrete-polymer Composites</b>	<b>363</b>
Performance tests on styrene-butadiene-styrene (SBS) polymer modified asphaltic concrete mixtures <i>Ali, M. K.</i>	365
On the relation between bond quality and impact-echo frequency spectrum <i>Piotrowski, T.; Garbacz, A.; Van der Wiellen, A.; Courard, L.; Nguyen, F.</i>	373
Realization of TRC façades with impregnated AR-glass textiles <i>Hegger, J.; Kulus, C.; Horstmann, M.; Schneider, M.</i>	381
Development of an ultra-lightweight thin film polymer modified concrete material <i>Kruger, D.; Van der Westhuizen, M.</i>	389
Design of sewer systems using reinforced thermoplastic materials <i>Elalem, A.; Rejeibi, S.; Belhaj, R.</i>	397
Polymer concrete solar tiles <i>Prusinski, R. C.; Wahby, W. S.</i>	405
Thermoplastic polymer concrete <i>Prusinski, R. C.; Prusinski, J. R.; Wahby, W. S.</i>	413
Use of waste polystyrene for production of cellular polymer-modified mortars for surface treatment <i>Zižková, N.; Drochytka, R.; Nosek, K.</i>	421
Polymer-modified mortars for corrosion protection at offshore wind energy converters <i>Lohaus, L.; Weicken, H.</i>	431
A new integrated environmentally benign approach to energy-efficient housing involving polymer concrete <i>Gunasekaran, M.</i>	437

Improving the resistance to sulphuric acid attack of precast concrete pipes with polymers. Technical and economical considerations <i>Torgal, F. P.; Jalali, S.</i>	441
Strength and durability characteristics of polymer-modified carbon fiber concrete <i>Torgal, F. P.; Gonzalez, J.; Jalali, S.</i>	449
<b>Interface Zone of Concrete/Polymer</b>	<b>455</b>
Prediction of creep deformation of PCC using models of standard cement concrete <i>Keitel, H.; Dimmig-Osburg, A.</i>	457
Microstructural analysis during the hydration of polymer in cement coatings <i>Weichold, O.; Hojczyk, M.; Adams, A.; Olaru, M. A.; Stanjek, H.</i>	465
Influence of PCE on the macro- and microstructure of air hardened foam concretes <i>Just, A.; Middendorf, B.</i>	473
Experimental and theoretical study on cracking behavior of concrete members reinforced with Fiber Reinforced Polymers (FRP) <i>Hegger, J.; Niewels, J.; Kurth, M.</i>	481
The technological factors affecting the bond strength of the ceramic tiles adhered to the concrete wall <i>Wasserman, I.</i>	489
Comparative study by spectroscopic techniques: surfaces of concrete after demoulding and after coating <i>Horgnies, M.; Chollet, M.</i>	497
Concrete rehabilitation using epoxy resins <i>Silva, L.; Aguiar, J. B.</i>	505
<b>Coatings and Crack Injection</b>	<b>513</b>
Results of a 12-year outdoor weathering of surface protection systems in different locations <i>Antons, U.; Orłowski, J.; Raupach, M.</i>	515
Innovative coating technology for textile reinforcements of concrete applications <i>Glowania, M.; Gries, T.; Schoene, J.; Schleser, M.; Reisgen, U.</i>	525
The role of polymer surface coating in sustainable structural rehabilitation of ASR affected RC beams <i>Hamada, H.; Tanikawa, S.; Swamy, R. N.</i>	533
Recent development of cement materials by incorporation of water repellent additives: hydration process, microstructure development and durability <i>Spaeth, V.; Delplancke-Ogletree, M. P.; Lecomte, J. P.</i>	543

Advanced coatings to improve the durability in continuous glass-fibre reinforced concrete <i>Weichold, O.</i>	551
Tests of flexible polymer joints repairing of polymer modified concretes <i>Kwiecień, A.; Gruszczyński, M.; Zając, B.</i>	559
Development of polymer modified hydro-insulating mortar from by-products <i>Drochytka, R.; Chlachulova, L.; Žižková, N.</i>	567
The effect of epoxy coating on sulfate attack on cement paste partially immersed in sulfate environment <i>Liu, Z.; China, P. R.; De Schutter, G.; Deng, D.</i>	577
Effect of concrete hydrophobation against chloride penetration <i>Årskog, V.; Borgund, K.; Gjorv, O. E.</i>	585
Surface treatment of concrete with polymer/organoclay nanocomposite <i>Di Maio, L.; Fariello, M. L.; Incarnato, L.; Scarfato, P.</i>	593
Optimization of polymer-cement coating composition using material model <i>Czarnecki, L.; Sokołowska, J. J.</i>	601
Case-study based comparison of protection coatings available for reinforced concrete <i>Kruger, D.; Araujo, M.</i>	609
Nucleation on polymer nanofibers and their controllable conversion to protective layers: preliminary theoretical study <i>Demo, P.; Hošková, Š.; Davydova, M.; Tichá, P.; Sveshnikov, A. M.; Krňanský, J.; Kožišek, Z.</i>	619
Silicon resin, a functional polymer in concrete <i>Wittmann, F. H.; Zhao, T.; Zhan, H.; Zhang, P.</i>	625
<b>Concrete Rehabilitation with Polymers</b>	<b>633</b>
Advanced seismic countermeasures for concrete bridges by using polymer in Japan <i>Kawakami, M.; Omata, F.; Matsuoka, S.</i>	635
Confinement of medium strength concrete cylinders with basalt Textile Reinforced Mortar <i>Garcia, D.; Alonso, P.; San-José, J. T.; Garmendia, L.; Perlot, C.</i>	643
Novel cold cured epoxy-silica hybrids as potential adhesives for concrete rehabilitation <i>Frigione, M.; Lettieri, M.; Mascia, L.; Prezzi, L.</i>	651
New repair method of cracked concrete airfield surfaces using of polymer joints <i>Kwiecień, A.</i>	657
Polymer-cement mortars of high bond strength to the concrete substrate <i>Łukowski, P.</i>	665

---

Seismic strengthening of I-shaped cross section pier with Carbon Fiber Reinforced Polymer <i>Iketani, J.; Tsukagoshi, H.; Kawakami, M.</i>	673
Self-healing concrete by means of encapsulated polymers <i>Van Tittelboom, K.; De Belie, N.</i>	681
Verification of applicability of design manners to SPR method for systemized design procedure <i>Hyodo, M.; Watanabe, M.; Suzuki, T.; Nonaka, T.; Ishii, M.</i>	689
MODINSYS – Modular systems for the protection and repair of concrete structures <i>Ramge, P.; Kühne, H. C.; Meng, B.</i>	697
Fiber Bragg Grating Sensor – Application in FRP for concrete structures <i>Kaeseberg, S.; Holschemacher, K.; Thiele, E.</i>	705
The use of modified epoxy with waste materials as rehabilitation material <i>Petránek, V.</i>	713
Freeze resistance of concrete modified with styrene-acrylic co-polymer additive for the repair of a breakwater in Gdynia Harbor <i>Gruszczyński, M.; Aleksium, M.</i>	721
Effect of specimen size on the strength of FRP-confined concrete <i>Al-Salloum, Y. A.; Almusallam, T. H.; Elsanadedy, H. M.; Abadel, A. A.</i>	729
Sensor based CFRP-monitoring and strengthening of concrete members <i>Holschemacher, K.; Kaeseberg, S.; Mueller, T.; Kieslich, H.; Klug, Y.; Thiele, E.</i>	
Some special features of compressed round CFRP confined concrete columns <i>Valdmanis, V.; Tepfers, R.</i>	745
Polymer modified cementitious repair systems for hydraulic structures in tropical climates <i>Singh, P.; Mahmud, H. B.</i>	753
Strengthening of RC cantilever members with Near Surface Mounted CFRP rods <i>Al-Mahmoud, F.; Castel, A.; François, R.; Tourneur, C.</i>	761
