

Advances in Materials Science and Restoration, No. 2

**Adhesion in Interfaces of Building Materials:  
a Multi-scale Approach**

Edited by

Lech Czarnecki  
and  
Andrzej Garbacz

Aedificatio Publishers

2007

## Table of Contents

<b>Preface</b>	1
<b>CHAPTER ONE: Methods of Adhesion Evaluation</b>	
<i>H. R. Sasse</i> Polymer Adhesion to Concrete – Theories and Engineering Aspects	7
<i>L. Czarnecki</i> Adhesion Level Prediction for Repair Concrete Systems	21
<i>B. Chmielewska</i> On the Methods of Bond Strength Measurement in Concrete Repair Systems	29
<i>A. Garbacz</i> The Usability of Wavelet Analysis for Nondestructive Evaluation of Repair Efficiency by Impact-Echo Method	47
<i>J. Piłat and M. Sarnowski</i> Application of Computer Image Analysis for Evaluation of Adhesion between Bitumen and Aggregate	59
<b>CHAPTER TWO: Micro- and Nanostructural Investigation</b>	
<i>W. Zhu</i> Application of Nanotechnology in Construction Materials	71
<i>H. Schorn</i> Experiments from the Macro to the Nanoscale	91
<i>L. Courard, D. Schwall and T. Piotrowski</i> Concrete Surface Roughness Characterization by means of Opto-Morphology Technique	107
<i>A. Garbacz and K. Kostana</i> Characterization of Concrete Surface Geometry by Laser Profilometry	117
<i>M. A. Glinicki and A. Litorowicz</i> Digital Analysis of Microscopic Images for Crack System Evaluation in Concrete Elements	127
<i>J. Piłat and J. Król</i> Analysis of Polymer Modified Bitumen Microstructure by Image Analyses after Ageing	141
	v

### **CHAPTER THREE: Material and Environmental Factors Affecting Adhesion**

<i>M. Schleser, U. Diltthey, F. Mund and S. Böhm</i> Improvement of Textile Reinforced Concrete by Use of Polymers	153
<i>P. Łukowski</i> Polymer-Cement Composites of High Bond Strength to the Concrete Substrate	163
<i>A. Halicka</i> Adhesion of Mineral Repair Materials based on Expansive Binders	173
<i>J.B. Aguiar, A.F. Camões, T.J. Pimenta, N.F. Vaz and M.M. Araújo</i> Effect of Temperature on Systems for the Reinforcement of Concrete	183
<i>W. Głodkowska and M. Staszewski</i> Weatherability of Coating Materials for Protection of Concrete	193
<i>L. Kwaśniewski and A. Garbacz</i> Computer Simulation of Stress Wave Propagation in Repair Systems	207

### **CHAPTER FOUR: Effect of Substrate Quality**

<i>M. Kawakami, A. Hassan and S. Matsuoka</i> Adhesion of Fiber-reinforced Concrete on Hardened Surfaces of High Strength Ductile Cementitious Composites	219
<i>G. Roessler</i> Effect of Mechanical Concrete Surface Preparation Processes on the Adhesion of Epoxy Resin Primers	229
<i>M. Siewczynska, J. Jasiczak, P. Kolodziej, A. Nietopiel</i> The Influence of Aggregate on the Surface Tensile Strength of Concrete Substrate	239
<i>T. Piotrowski, A. Garbacz, D. Schwall and L. Courard</i> Effect of Concrete Substrate Quality on Stress Wave Propagation in Repair Systems	247
<b>Author Index</b>	259
